NORWEGIAN PATTERNS

Most Norwegian knitting designs, especially those involving color work, are symmetrical in nature along central stitches of both front and back. Thus, due to the complexity of Norwegian patterning, an even number of repeats often does not occur as in Fair Isle knitting; the knitter is instructed to place markers at specified points in the work, marking the patterns' side edges. It is important to take care when reading instructions and charts to keep the designs centered on both the garment's front and back. To work from a Norwegian pattern graph begin at the first marker (left side of front for pullovers or right front opening for cardigans) with the stitch marked "Beg here" on the graph and work to the next marker (right side of front/back for pullovers and cardigans). Work the back of the body, beginning again as instructed on the graph. For pull-overs, complete the round or for cardigans, work to the next marker and begin the left front so that the left front is a mirror image of the right front. The pattern will be centered on both front and back of the garment, matching at the shoulders.

SIZES & GAUGE

Study the finished measurements listed in the pattern; the smallest size is listed first on both the graphs and in the pattern instructions. Many of the designs are generously sized, especially the unisex sweaters, so it is important to choose the size that will fit properly.

It is important to maintain the correct gauge while knitting because the finished measurements and shape of your garment are completely dependent upon gauge. If you knit looser than the gauge given in the pattern instructions, try needles one size smaller. If you knit tighter, try needles one size larger.
